Frontend and full-stack developer in Melbourne. I build web apps with React, TypeScript and Node.js. Before that I spent two years in QA, so I test what I build. Finishing my Master of IT at Monash in December 2026. Open to frontend, full-stack and QA roles, anywhere in Australia.

EXPERIENCE

Frontend Developer | Ailevate Pty Ltd, Melbourne · Dec 2025 - Present

- **FlowIQ** (project control app for construction builders): built the frontend and backend in React, TypeScript, Express and Prisma, with login and user roles, checks for double-booked resources and overdue tasks (tested in Vitest), and Docker setup.
- **Sporty Potato** (sports court booking): built the venue admin dashboard on my own in Next.js and Tailwind CSS. Venues use it to manage courts, classes and bookings.
- **Lalita Music School** (Jun - Sep 2026): built the frontend for four portals (admin, teacher, student, guardian) in React 19 and Tailwind CSS. The student and guardian side installs as an app and works offline.
- **Interscale:** tested an AI email routing agent for a client: wrote a 34-case test plan and the UAT sign-off.

Quality Assurance | Blitz Electric Mobility, Jakarta · Mar 2023 - Jan 2025

- Wrote test plans and automated regression tests (Selenium, Postman) for web apps and APIs, ran UAT, and sorted bug reports in Jira by how serious they were, in an international Agile team.

Software Engineer Intern | Directorate General of Civil Aviation, Tangerang · Jun - Aug 2020

- Led a team of 4 building the organisation's landing page and a maintenance system website for lab repairs and airport electronics (Laravel, PHP, MySQL).

Laboratory Assistant | Sumatra Institute of Technology, Lampung · Aug 2018 - Jan 2020

- Led lab classes in Data Structures & Algorithms (C++).
- Led lab classes in Intro to Computer Architecture and Software.

PROJECTS

Emberhawk | offline bushfire preparation app · Industry project, team of 5, 2026 · emberhawk.app

- Built the app, API and AWS deployment (React, TypeScript, Node.js, PostGIS); teammates did data science, AI and security. Works fully offline after one download. Ran the team's Kanban board.

Sit&Fit | exercise app for people with disabilities · Team project (4 people), 2026 · GitHub

- Android app that checks exercise form and counts reps with the phone camera. Built the screens (Kotlin, Jetpack Compose), local database, reminders and progress tracking. Lead contributor (73 of 155 commits).

CommonGoal | climate action web app · Solo project, 2026 · commongoal-4a77b.web.app · GitHub

- Built the whole app in Vue 3 and Firebase: sign-in with member and admin roles, map directions, Cloud Functions, CSV and PDF export, admin charts. Lighthouse accessibility 100.

SKILLS

Frontend and mobile: React, Next.js, TypeScript, JavaScript, Vue 3, Vite, Tailwind CSS, PWAs, Kotlin, Jetpack Compose

Backend and data: Node.js, Express, REST APIs, Prisma, PostgreSQL (PostGIS), SQLite, MySQL, MongoDB, Firebase

Testing: Playwright, Vitest, Selenium, Postman, UAT, regression testing

Tools: Git, Docker, AWS, Jira, Confluence, Agile (Scrum, Kanban)

Languages: English (IELTS Academic 7.0, 2024), Indonesian (native)

EDUCATION

Master of Information Technology | Monash University, Melbourne · 2025 - Dec 2026 (expected) · LPDP scholarship

Bachelor of Computer Science (S.Kom.) | Sumatra Institute of Technology, Lampung · Aug 2017 - Dec 2022

- Thesis: IoT prototype for automated library book returns (Arduino + RFID).
